SUMMARY

Full Stack Developer (Python • Django • React • PostgreSQL • AWS) with 2+ years experience building production grade SaaS systems, including a Sales Quote Management System deployed across 9+ countries that cut approval turnaround by 75%. Building Retrieval Augmented Generation (RAG) systems end to end including document ingestion, vector search (pgvector, FAISS), and LLM based question answering including enterprise grade RAG platform.

EXPERIENCE

ParamCS Software Services LLP

Aug 2024 - Present

Software Developer

Sales Quote Management System | Django • PostgreSQL • AWS EC2 • Docker • Celery • REST APIs

- ERP-style quoting platform deployed across 9+ countries, processing 10,000+ sales quotations to date, cutting approval turnaround by 75%.
- Built automated multi level approval workflows with RBAC and role-scoped permissions across sales, finance, and management personas.
- Built automated invoice and PDF report generation pipelines with multi currency support.
- Implemented a custom email scheduler with configurable parameters and timezone aware delivery; deployed on AWS EC2 with Docker-based containerization.

SmartDMS | Python • Django • SQL Server • FAISS • Ollama • Celery • Redis

- Built an AI driven quotation engine that ingests 4-5 dense, heterogeneous documents per request (specs, purchase orders, technical datasheets) and generates a recommended quotation by extracting and reconciling relevant fields across all inputs using retrieval augmented generation.
- Designed a Prompt Configuration engine (versioned, document type aware prompts driving retrieval parameters at runtime) and a Document Type Management module, eliminating hardcoded prompts and letting the system generalize across new document types without code changes.

Founders First

Jan 2024 - Jun 2024

Contract Full Stack Developer

Custom Sales CRM | Django • React • PostgreSQL • PayUMoney • Docker • REST APIs

- Built a scalable CRM (Django, React, PostgreSQL) centralizing lead management, sales operations, scheduling, and RBAC; integrated PayUMoney for automated payment processing, developed REST APIs and optimized data workflows to improve sales pipeline visibility.

PROJECTS

RAG Based Document Q&A Engine | Python • Django • PostgreSQL/pgvector • React • Celery • Docker

MCA Final Year Project

- Architected and built a full stack RAG pipeline enabling natural language Q&A over user uploaded PDFs: async ingestion (chunking + embedding via django-q2), vector similarity search on PostgreSQL/pgvector, and LLM based answer generation with source grounded citations. JWT authenticated REST API (DRF) with React/Vite frontend; includes pytest test coverage for ingestion and query pipelines.

SKILLS

Programming Languages: Python, JavaScript, SQL, C#.

Frameworks & Libraries: Django, Django REST Framework, React, ASP.NET, Celery, django-q2.

Cloud & DevOps: AWS, Docker, Linux (Shell bash).

Databases: PostgreSQL, pgvector, SQL Server, Redis, FAISS.

AI / GenAI: OpenAI API, Ollama, RAG, LLMs, Sentence Transformers.

Tools & Concepts: Git, GitHub, Postman, Vercel, CI/CD, Agile, GitHub Copilot, Cursor AI.

EDUCATION

Amrita AHEAD (Online) - MCA | CGPA: 8.7

Oct 2024 - Present

DY Patil University, Pune - BCA | CGPA: 8.6

Aug 2021 - May 2024

CERTIFICATIONS & BADGES

Google Cloud Computing Foundations Certificate - Google

Aug 2025

CCNA: Switching, Routing, and Wireless Essentials - Cisco

Nov 2025
