SUMMARY

Full Stack Developer (Python • Django • React • AWS) with experience building production grade SaaS systems. Delivered a multi-tenant Sales Quote Management System across 9+ countries cutting approval turnaround by 75%. Comfortable working across Python, JavaScript, and .NET codebases, with experience building LLM driven automation and currently developing GenAI pipelines.

EXPERIENCE

ParamCS Software Services LLP

Aug 2024 - Present

Software Developer

Sales Quote Management System | Django • React • PostgreSQL • AWS EC2 • Docker • Celery • REST APIs

- Multi-tenant ERP-style quoting platform deployed across 9+ countries, processing 10,000+ sales quotations to date; cut approval turnaround by 75% via automated multi-level workflows with RBAC and role-scoped permissions across sales, finance, and management personas.
- Built automated invoice and PDF report generation pipelines with multi-currency support; implemented a custom email scheduler supporting configurable parameters and timezone-aware delivery. Deployed on AWS EC2 with Docker-based containerisation.

Additional responsibilities at ParamCS:

- Contributed to OnTrack, a .NET / SQL Server field-service platform (IIS-hosted) managing service scheduling, installed-base records, and customer call tracking; independently designed and built a database-driven User Access Control module with granular role-based, module-based, and claim-based permission enforcement, replacing ad-hoc access logic across the application.
- Built an internal R&D prototype for LLM-based structured data extraction from business documents using Ollama; integrated parsed JSON outputs into existing workflows to reduce manual data entry.
- Guided as a technical resource to a junior developers unblocking logic challenges, clarifying business requirements, and co-building frontend features.

Founders First

Jan 2024 - Jun 2024

Contract Full Stack Developer

Custom Sales CRM | Django • React • PostgreSQL • PayUMoney • Docker • REST APIs

- Built a scalable CRM from scratch supporting 10,000+ concurrent users with lead management, scheduling, and RBAC.
- Integrated PayUMoney payment gateway with full checkout flow, webhook-based status handling, and reconciliation logic; wrote unit and integration tests using pytest.

PROJECTS

RAG-Based Document Q&A Engine | Python • OpenAI API • pgvector • Celery • Redis • React • Docker

MCA Final Year Project

- Built a RAG pipeline on AWS EC2 + S3, PDF ingestion, chunking, and OpenAI embeddings stored in pgvector (no paid vector DB); top-k similarity search feeds a structured LLM prompt returning cited, hallucination-resistant answers. Multi-document querying supported; async Celery + Redis ingestion for large files; React frontend, fully Dockerised.

SKILLS

Languages: Python, JavaScript, SQL, Bash, C# / .NET, HTML/CSS

Frameworks & Libraries: Django, Django REST Framework, React, ASP.NET, Celery, pytest

Cloud & DevOps: AWS (EC2, S3, VPC), Docker, Jenkins, Linux, Nginx, IIS

Databases: PostgreSQL, pgvector, SQL Server, Firebase, Supabase, Redis

AI / GenAI: OpenAI API, Ollama, Prompt Engineering, RAG pipelines, LLM document extraction

APIs & Auth: REST APIs, JWT, OAuth 2.0, RBAC, Webhooks, API versioning

Tools: Git, GitHub, Postman, Swagger / OpenAPI, Vercel

Concepts: Multi-tenant SaaS, RAG / Vector Search, System Design, Microservices, CI/CD, Agile / Scrum

CERTIFICATIONS

Google Cloud Computing Foundations Certificate - Google

Aug 2025

CCNA: Switching, Routing, and Wireless Essentials - Cisco

Nov 2025

EDUCATION

Amrita AHEAD (Online) - MCA | CGPA: 8.7

Oct 2024 - Present

DY Patil University, Pune - BCA | CGPA: 8.6

Aug 2021 - May 2024
